CAREER OBJECTIVE

Recent Electronics & Communication Engineering graduate with hands-on experience in Python programming, SQL, software development, and Data Analysis through Internship and academic projects. Strong understanding of object-oriented programming, software development lifecycle, debugging, version control, and problem-solving. Passionate about building scalable software applications and eager to contribute as a Software Engineer.

TECHNICAL SKILLS

Languages	Python, SQL
Databases	SQL, Database Design, Query Optimization
Libraries	Pandas, NumPy
API Development	Rest API, Fast API, JSON, Restful API
Tools	Git, GitHub, VS Code
Cloud Platform	AWS Fundamentals, Docker, Jenkins, CI/CD
Software Development	OOP, SDLC, Debugging, Testing, Problem-Solving, Code Optimization

EDUCATION

B.Tech — Electronics & Communication Engineering 2020 – 2024
DVR & Dr. HS MIC College of Technology, Vijayawada CGPA: 8.4

PROJECTS

Image Captioning and Voice Synthesis using YOLO Algorithm — Python, YOLO, NLP

- YOLO algorithm detects and localizes multiple objects in images using real-time Deep learning techniques.
- Detected objects are converted into meaningful visual information using NLP models.
- An NLP model generates a descriptive caption explaining the content and context of the image.
- Voice synthesis technology converts the generated text caption into clear and audible speech output.

Student Management System (Python + SQL)

- Developed a console-based application to manage student records.
- Implemented CRUD operations using Python and SQL.
- Applied modular programming and exception handling.
- Improved data management efficiency through database integration.

Real Estate Property Data Scraping & Analysis — Python, Pandas

- Scraped property listings and market data from Makaan.com.
- Cleaned, transformed and analyzed datasets to extract key pricing and location insights.
- Built visualizations to observe trends in property rates and demand patterns.

INTERNSHIP & TRAINING

Python Intern | VXL IT Solutions (Remote) Aug 2024 – Nov 2024

- Developed Python scripts to automate repetitive tasks and improve workflow efficiency.
- Worked with SQL databases for storing and retrieving application data.
- Implemented object-oriented programming concepts to create reusable code.
- Debugged and optimized Python applications for improved performance.
- Collaborated with team members using Git and GitHub.

CERTIFICATIONS

- Python for Data Science — IBM Developer Skills Network
- Programming in Python — Udemy
- AWS Cloud Computing — Great Learning

SOFT SKILLS

- Strong Problem-Solving & Analytical Thinking
- Effective Team Collaboration & Strong Communication Skills
- Time-Management | Quick Learner | Adaptability
